PROFILE

Versatile Software Developer with 2+ years of experience building high-performance, scalable applications across mobile and backend systems. Proficient in Dart and Flutter, with a strong foundation in Java, C, C++, and Python, plus hands-on experience with REST APIs, Firebase, SQL, and FastAPI. Skilled in BLoC, Provider, MVVM, Clean Architecture, OOP, and core networking concepts. Proven track record delivering multi-tenant SaaS platforms, AI-integrated mobile apps, and production backend services, with a strong ability to quickly learn and apply new technologies.

SKILLS

Mobile Development: Flutter, Dart, Android, iOS, Cross-Platform (Web, Windows, Linux, macOS)

State Management: BLoC / Cubit, Provider

Architecture: Clean Architecture, MVVM, Repository Pattern, OOP

Backend & APIs: REST APIs, FastAPI, Firebase (Auth, Firestore, FCM, Admin SDK), JWT, OAuth 2.0

Programming Languages: Dart, Python, Java, C, C++, SQL

Tools & Integrations: Git, GitHub, Dio, Mapbox SDK, Paymob, WhatsApp API, Email API (Brevo)

Additional Knowledge: Basic Networking, Packet Tracer, Internationalization (AR/EN)

EXPERIENCE

Freelance Flutter & Software Developer

2023 – Present

Self-Employed · Remote

- Design and build cross-platform mobile applications end-to-end for clients, from architecture and API integration to deployment on Android and iOS.
- Deliver production-grade Flutter apps using Clean Architecture, BLoC/Provider state management, Firebase, and REST API integrations.
- Manage full project lifecycle independently: requirements gathering, technical design, development, testing, and client communication.

Flutter Track Instructor

2025 – 2026

Google Developer Group (GDG) On Campus · New Cairo Technological University

- Instructed students in Flutter and Dart fundamentals, state management, and mobile app architecture as part of the GDG On Campus program.
- Designed and delivered hands-on training sessions and project-based learning for the Flutter track.

Summer Intern

Summer 2025

Xceed Contact Center

- Completed a compulsory internship program, gaining exposure to structured, deadline-driven work environments.

PROJECTS

Be Souhola CRM

04/2026 – 06/2026

Cross-platform, multi-tenant SaaS CRM mobile application for real estate and sales organizations, built with Flutter & Dart. Each company operates under its own subdomain with JWT authentication, 2FA, and role-based access control across 15+ roles. Features real-time sales dashboards and KPIs, full lead lifecycle management, task management, marketing campaign tracking, a dual inventory system (real estate & general), in-app WhatsApp/Email messaging, GPS-based field visit check-ins, Firebase Cloud Messaging push notifications with deep-link routing, an AI chatbot, full bilingual (Arabic/English) support with dark/light themes, and PDF export. Architected with Clean Architecture across 4 layers and 18+ Provider state controllers, integrating 30+ REST endpoints via Dio; deployed to Android, iOS, Web, Windows, Linux, and macOS from a single codebase.

Tech Stack: Flutter · Dart · Provider · Dio · Firebase FCM · REST API · JWT · Geolocator · WhatsApp API · Email API · PDF Generation · Clean Architecture · i18n (AR/EN)

ZOOR – AI-Powered Tourism App

02/2026 – 07/2026

Full-scale, cross-platform tourism mobile application for Egypt, built with Flutter & Dart for Android and iOS, serving two independent user roles — tourists and tour guides — each with its own authentication flow and dashboard. Key features include an AI-powered itinerary generator with async polling against a custom ML backend, an AI chatbot supporting text and image-based queries, Mapbox-powered turn-by-turn navigation with GPS-based emergency services, a Grand Egyptian Museum explorer with artifact browsing and ticket booking, QR-code-based tour guide check-in, and a full car rental and trip booking system. Built with Clean Architecture and BLoC/Cubit across 31 state machines, using Firebase (Auth, Firestore, FCM) as the cloud backbone, Google OAuth 2.0, and OTP verification.

Tech Stack: Flutter · Dart · BLoC/Cubit · Firebase (Auth, Firestore, FCM) · Mapbox SDK · REST API · Dio · Geolocator · QR Scanner · Google OAuth 2.0 · Clean Architecture

ZOOR API Server

02/2026 – 07/2026

Backend REST API powering the ZOOR tourism platform, built with FastAPI (Python) for high-performance asynchronous request handling. Implements Firebase Admin SDK UID authentication on every protected endpoint, a governorate-based tourism data engine with top-rated discovery and hidden-gems endpoints, AI-generated video upload and management (up to 150MB), Paymob payment gateway integration (create, query, refund, void, capture) for ticket purchasing, and OTP-based email verification and password-reset flows via Brevo with branded HTML templates. Includes Pydantic schema validation and production-hardening measures such as server identity masking, hidden API documentation, and structured error handling.

Tech Stack: FastAPI · Python · Firebase Admin SDK · Paymob · Brevo · Pydantic · REST API · Nginx
